

Case Study - Dolby

70 high performance acoustic doors installed for IMG

IAC were a pleasure to work with and very efficient when it came to the installation.

Dolby is a globally recognised innovator of sound, video and voice technologies for cinemas, home theatres, PC's, mobile devices and games. Dolby Digital is the name for audio compression technologies developed by Dolby Laboratories, with the first use of Dolby Digital to provide digital sound in cinemas from 35mm film prints.

The new Dolby Europe headquarters in Soho Square, London, has been furnished with a flagship 70 seat preview theatre that can handle every format of film and video, as well as video conferencing.

Within their new offices there is the new Ray Dolby Lounge and Theatre which are both designed as a reference room for both sound and image. The new state of the art Theatre seats 67 people and features the latest sound and projection technologies such as 4K DLP Cinema® projector featuring Dolby® 3D digital cinema at high frame rates and 35 mm projector featuring Dolby Stereo, Dolby SR, Dolby Digital, and Dolby Digital Surround EX™ HD projector.

The Ray Dolby Lounge which is also available for exclusive hire to host guest before and after a screening needed to be acoustically sound to ensure the quietest conditions whilst movie screenings were taking place.
