

### Product Description

The CMD captive mounts is used for engines / equipment with large amplitudes caused by imbalance. It is designed with an integral overload stop which controls the movement of equipment during transit and provides a fully failsafe arrangement. CMD mounts are suitable for both mobile and static applications.

The CMD is a cost effective, high performing and easy to install mount using universal fittings for a wide range of applications.

The rubber is used in shear and compression providing optimum performance. The metal top cap provides protection from contaminants such as oil, fuel and UV rays.

Load ratings up to 130kg.

### Applications

Diesel engines, generator sets, pumps, compressors, vehicles, marine engines, and construction plant equipment.
